PoP Vote brings blockchain security to the electoral system and greater reliability to the entire electoral process.

Each vote is registered on the blockchain without the voter's identification thus maintaining anonymity.

The votes registered on the blockchain can no longer be changed.

Only the responsible organ can release the investigation to the public.

Application login

To enter the PoP Vote simply access with your CPF number or voter title.

The PoP Vote you can use a database provided by a responsible organ to authenticate users on the platform. This process ID can be set to the organ responsible for the election.
